and efficient
psychometric
assessment”*

WHAT OUR SOLUTION OFFER

The management of psychometric assessment is an essential operation for every HR Department or Consultant. Human Innovation Technologies S.A. has developed an innovative computerized platform to host psychometric tests, administer the assessment procedure and produce automatic reports on the results.

Our platform enables the hosting of a great variety of psychometric instruments and offers a fully automated analysis of the results. It also offers an effective reporting systems with customization options. The system is internet / intranet based, suitable for by distance use.

The platform is especially designed by:

- Psychologists specialized in controlling the psychometric validity of the results.
- Specialists in assessment and certification of qualifications.
- Computer engineers experienced in developing user-friendly applications for surveying.

FLEXIBLE MODULAR ARCHITECTURE

- Client-server architecture, with MS SQL (or MySQL) server and .NET technology-based apps.
- Automated and by distance, application update or upgrade.
- Multiple "user profiles", with different access rights and permissions, according to the needs:
 - Assessment instruments Designer
 - Users and Subscriptions Administrator
 - Assessment results Administrator
 - User to be assessed

"The most efficient and accurate platform to run psychometric assessment projects."

FEATURES AND FUNCTIONS

Our Platform adds value to your business by offering:

- Various installation schemes and models of use (local users, distant users, assessment center, multiple regional assessment centers, etc.)
- End-user self-registration function by using a unique key-code.
- Simple and scientifically validated graphic user interface.
- Wizard enabling browsing through the test and reviewing answers.
- Access to examples and assistance during the test.
- Development and hosting of an unlimited number of tests.
- Support of all the basic psychometric instrument types, with multiple response scales, including image/icon-based questions.
- Support of sub-scaling according to the requirements of the specific psychometric instrument.
- Data analysis by using predefined or automatically calculated (local) norms.
- Automated reporting system, with on-screen and “save as a file” features, including data, charts and analytic interpretation of the results.
- Easily searchable database by assessment project, by user, or by test.
- Recording of the time stamp and the duration of each user participation.

“An innovative tool for the scientific psychometric assessment”

ADVANTAGES AND VALUE TO YOUR ORGANIZATION

Our Psychometric Assessment Platform offers you important benefits:

- Flexibility and adaptation to your organization’s special needs, by supporting a great variety of psychometric instruments.
- Simple to use and cost-effective solution with reduced administration burden.
- Fully automated reporting system and results analysis.
- 360o assessment built-in capabilities, supporting an unlimited number of assessor groups (colleagues, family members, friends, supervisors, etc.)

COMPANY PROFILE
